

## Automatic Edge Alignment Relaxing Machine(Air-blowing)

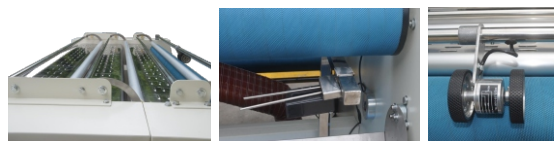

GOA-1800E- BR-ED

### Features

1. Roll fabric unwound and folded as flat fold state, to achieve the tension free for fabric placing.
2. Wave type air blowing device, in loosening fabric process, fabric is relaxed by the blowing device.
3. Adopted frequency variator driving the stepless speed control, more stable when fabric relaxation. Any speed can be set freely.
4. Special air-blowing device, create vibration for fabric, speed up the fabric tension release.
5. Electronic scale measurement and display can measure fabric length accurately.
6. Forward and reverse control, can loosen fabric with right or wrong side and backward for rewinding.
7. Intelligent controller for edge-to-edge alignment, makes fabric folded neatly after relaxation.
8. Inverter controls the front fabric roller, and electronic sensor detected the fabric present, then delay to stop fabric placing to ensure tension free fabric placement.
9. Inverter for stepless speed control, relaxation speed and air-blowing capacity can be adjusted, in order to fulfil various types of fabric.

### Application 适用范围

Knit, woven, elastic fabric and other general fabric.  
针织、梭织、弹性布等常规布料。

## 吹风式自动对边松布机

GOA-1800E- BR-ED

### 机器特性

- 1、将卷布开松折叠成匹布，实现无张力放布；
- 2、波浪式气流吹气装置，在松布过程中经吹气装置使面料得到放松；
- 3、采用变频变速器进行无级调速，使松布更加平稳，速度可随意设定。
- 4、独特的吹风装置，使面料产生振动，加速面料张力释放；
- 5、配备电子计米显示屏，精准测量布料长度；
- 6、正反转控制，可正、反面松布及倒后回卷；
- 7、配有智能对边控制器，使松后的布料折叠整齐；
- 8、变频器控制前面卷布轴，电眼感应到有布会延时停止放布，保证无张力放布；
- 9、采用变频器进行无级调速，松布速度及吹风量大小可调，以适应不同种类面料。

### Parameters 机器参数

Model 型号	GOA-1800E- BR-ED
Max. Fabric Roll Diameter 最大卷布直径	400mm
Maximum Effective Fabric Width 最大有效幅宽	1800mm
Speed 速度	0-30m/min
Power 功率	1.0kW
Voltage Supply & Frequency 电压&频率	AC 220V 50Hz

(Other sizes can be customized 其他尺寸可定制)
