

## Automatic Edge Alignment Fabric Inspection Machine

GOA-2100C-JS-ED

### Features

1. Inspection, fabric rolling (with automatic edge alignment function), fabric folding, measurement.
2. Electronic sensor automatic detection, realize fabric relaxing without tension.
3. Equipped with electronic measurement display, measure fabric yardage accurately.
4. Multi-function control panel, The upper and lower light panels can be controlled separately.
5. Back and forward control, once not sure the defects during inspection, return back is possible for further checking.
6. Equipped with three spiral rollers for fabric smoothing, effectively make fabric flat without wrinkle, specially suit for knits fabric.
7. Equipped with intelligent edge alignment controller, auto-edge alignment feature, maximize and guarantee the edge alignment of fabric rewinding is straightly line up.
8. Tension adjust balance shafts, adjustable with different position according to various fabric types.
9. Equipped with pedal control, once found problem during the inspection, able to stop with machine brake for defection labelling.
10. Effectively inspect fabric defects, reduce defective products, ensure fabric quality and improve clothing quality.

### Application

Knit, woven, elastic fabric and other general fabric.

### Parameters 机器参数

Model 型号	GOA-2100C-JS-ED	Speed 速度	0-30m/min
Max. Fabric Roll Diameter 最大卷布直径	400mm	Power 功率	1.3kW
Maximum Effective Fabric Width 最大有效幅宽	2100mm	Voltage Supply & Frequency 电压&频率	AC 220V 50Hz

(Other sizes can be customized 其他尺寸可定制)

## 自动对边多功能验布机

GOA-2100C-JS-ED

### 机器特性

- 1、验布、卷布（带自动对边功能）、松布、量布；
- 2、电子眼自动感应，实现无张力放布；
- 3、配备电子计米显示屏，精准测量布料长度；
- 4、多功能操作面板，可单独控制上下灯盘；
- 5、正反转控制，在检验过程中如不确定瑕疵点，可回卷，再次检验布料；
- 6、配有三头螺旋式梳布轴，有效梳理面料，使布料平整，特别适合针织面料使用；
- 7、配有智能对边控制器，自动对边功能，最大限度保证布料回卷后一边整齐一致；
- 8、张力调节平衡轴，可根据不同面料调节穿布位置；
- 9、配有脚踏板控制功能，如检验过程发现布料有问题可立即刹车做标记；
- 10、有效检验布料瑕疵，减少不良品，确保面料品质，提高服装质量。

### 适用范围

针织、梭织、弹性布等常规布料。
