

床笠裙边机 (拷边)

Automatic Mattress Protector Sewing Machine (Edge Overlock)

适用范围 Application

适用于床笠的加工，一体化完成橡筋与裙边，裙边与底片的拷边缝合。

Suitable for the processing of bedsheets, integrating the stitching of rubber bands and skirt edges, as well as the stitching of skirt edges and negatives.

机器参数 Parameters

推荐型号: Recommend Model:	GOA-AS-NM-ED-2-O4×5-CN-AEG-1P220	机头最高转速: Max. Speed:	7000RPM
线迹: 拷边线迹 Stitch: Edge Stitching		电源: Power Supply:	220V/50Hz
缝制裙边宽度: Sewn Hem Width:	200mm-500mm	占地面积: Machine Size:	2650mm×2050mm×1850mm (L×W×H)
功率: Power:	2kW	气源: Air Supply:	0.4MPa-0.8MPa

床笠裙边机 (拷边) Automatic Mattress Protector Sewing Machine (Edge Overlock)

机器特点

- 机头采用飞马包缝机 (拷边线迹), 转速高、性能稳定。
- 上下机头同步工作, 集橡筋与裙边缝制, 裙边与底片缝合一体化完成。
- 橡筋张力控制及自动导向结构, 保证橡筋缝制自动化完成。
- 裙边自动纠偏对边功能, 保证橡筋缝制过程中不会出现瑕疵, 连续缝制。
- 脚踏控制缝制转速, 切缝一体, 多余边料吸屑装置吸附收集。
- 裙边宽度支持200mm-500mm。
- 具有断线检测功能。
- 大号线轴上线架, 避免频繁换线。
- 机器占地空间小, 功率低, 减少能源浪费。

Features

- Pegasus over-lock sewing head with high speed and stable performance.
- The upper and lower handpieces work synchronously, integrating the sewing of rubber band and skirt edge, and the sewing of skirt edge and negative film.
- Elastic band tension controlling structure, automatic guiding and feeding, ensures the band automatic sewn.
- Automatic edge-lean detection and edge-alignment, ensure no defect during the smooth and continuous sewing.
- Foot-pad control sewing speed, cutting and sewing simultaneously, special scrap collection box.
- Hemline width is 200-500 mm.
- Thread breakage detection.
- Large size spool, free of frequent thread changing.
- Small installation space, less power and more energy-saving.

主要配置 Machine Configuration

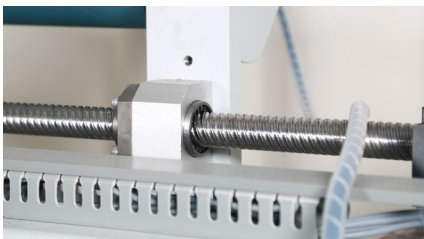

人机交互触摸屏设计
Design of Human-computer
Interactive Touch Screen

自动对边功能
Automatic Edge Alignment Function

上/下机头: 飞马包缝机
Upper/Lower Machine Head:
Pegasus Overlock Sewing Machine

丝杠驱动
Lead Screw Drive

大线轴设计
Large Size Spool

负压吸纳装置
Vacuum Absorption Device
